Esterhazy High School
555 Arcola Street
Box 640
Esterhazy SK S0A 0X0

Dear Parent/Guardian,

A case of COVID-19 has been diagnosed in an individual in Esterhazy High School, connected to Grades 6A & 6B. We have determined that the case was in attendance while communicable on Nov. 4, 2021.

The case and/or parent/guardian is being asked to notify their close contacts directly including household, social (this may include friends from school), extracurricular activities, teammates and coaches, etc. Public Health will be providing a letter with directions for students of the affected classroom(s).

The virus spreads from person to person by large, respiratory droplets, like from a cough or sneeze and we advised your school to continue to have routine measures in place to reduce the spread.

We remind everyone entering schools to monitor daily for any signs or symptoms of COVID-19. We strongly recommend that everyone who is eligible gets both doses of two-dose COVID-19 vaccine series, including all household members or students and staff members.

Refer to the What You Need to Know About COVID-19 fact sheet for general information about COVID-19. Individuals who have not been vaccinated are at highest risk of developing infection and severe illness.

If anyone develops symptoms, please self-isolate at home and seek testing immediately. Should you require medical attention, it is important to call ahead to your health care provider’s office so arrangements can be made for you to be seen a way that reduces the chance of exposing other individuals.

For further information regarding COVID-19, please call Health Line at 811, and/or visit the Saskatchewan Ministry of Health website at www.saskatchewan.ca/covid19.

Sincerely,

Dr. Ashok Chhetri
Medical Health Officer,
Saskatchewan Health Authority
